### JAVA SOFTWARE ENGINEER

Experienced software engineer with 2+ years in **Spring Boot** and **Microservices** projects. Proficient in **Spring Boot**, **Hibernate**, **Kafka**, **RabbitMQ**, **JWT security**, and **Third-party integrations**. Skilled in **Tomcat** server deployment and logs management. Also adept in **React.js**, **Tailwind CSS**, routing, and **REST requests** for frontend development. Proven track record of delivering high-quality and efficient solutions. Ready to contribute effectively toward team and excel in challenging environments. I have delivered numerous projects while leading some of the projects as **lead backend developer** mentoring my juniors and interns .

### PROFESSIONAL EXPERIENCE

#### Vivatech R&D

Feb 2023 - Present

##### Java Software Developer

- **Efficient development:** Developing spring boot **modules** and **microservices** with better technical practices and quality code with proper design requirements and system structure.
- **Team Leads:** Efficiently delivering products with **Agile methodology** and client satisfaction, **leading** junior developers with project planning and **following** senior developers' lead over priority projects.
- **Technical solutions:** Solving major project deadbolts with proper system planning and technical approaches like **Schedulers**, **Async**, **Event handling**, **Kafka**, **RabbitMQ**, etc.
- **Code reviews:** Independently **Review** and **Analyze** existing applications' effectiveness and efficiency, and then develop strategies for improving or leveraging these systems.

#### CSKA Automation

April 2022 - January 2023

##### Java Software Developer Intern

- **Backend Responsibilities:** Expertly handle backend tasks within the Spring Boot framework, ensuring a high level of responsibility and front-end formatting models and developments.
- **Database Architecture:** Participate in designing databases, specifically in projects related to team management and decision-making.
- **API Development:** Skilled in creating robust APIs for seamless service communication, with a solid understanding of data structures.
- **Collaborative Engagement:** Contribute actively to teamwork, particularly in projects involving team management and discussions.

#### Apoliums Infotech

June 2021 - August 2021

##### PHP Web Developer Intern

- **Backend Responsibilities:** Expertly handle backend tasks within the Spring Boot framework, ensuring a high level of responsibility.
- **SQL Proficiency:** Executed various SQL operations, showcasing competence in database management.
- **Deployment Management:** Successfully handled project deployments using FileZilla, ensuring seamless transitions from development to production.

### SKILLS

Java Spring boot	MySQL	Apache Tomcat
Microservices Architecture	React Js	Github
JPA & Hibernate	PHP Laravel, CI	Filezilla
Apache Kafka	React native	Jenkins

### EDUCATION & CERTIFICATIONS

#### Bachelor of Engineering

Majors: Computer Science and IT  
IES IPS Academy Indore

### PERSONAL PROJECTS
